Clearview Local School District Renovation and Addition to High School and Middle School/ New Elementary School

Construction management services were provided to the Clearview Local School District and the Ohio School Facility Commission for three schools with varying types of building programs from renovation to restoration to additions. Our services included intense pre-construction, partnering sessions, along with the usual and customary project management services during the construction phase.

Clearview High School was renovated and three additions added for a total building area of over 100,000 s.f. as well as a 7,000 s.f. locally funded auditorium.

Durling Middle School was renovated and a 17,000 s.f. classroom addition for a total building area of approximately 70,000 s.f.

Vincent Elementary School was renovated and two additions for a total building area of over 60,000 s.f.

All three schools received extensive kitchen/cafeteria renovation with state-of-the-art equipment. The project also included complete technology upgrades at all three schools.

Our owner/construction management team effectively managed construction phasing with no interruption to ongoing school curriculum.
