**Value**

\$ 23.1 Million

Construction of a new athletic center inclusive of two NHL-sized ice skating rinks. The center includes a 2-room fitness center, one containing free weights and the other fitness equipment. Seven locker rooms were added to improve the school's current facility for the football team and other outdoor sports. The athletic center includes a concession area and multi-purpose room that is to be used for studying and team meetings.

Additional construction management services were provided to oversee the challenging construction of a new gymnasium and state-of-the-art natatorium with new locker facilities, training and administrative areas..
