Construction Value
\$ 8.2 Million

Demolition of existing and construction of a new, 2-story 60,779 s.f. elementary school in Lakewood, Ohio. Scope of work included all site work and selective demolition. The original gymnasium, boiler room, some storage rooms and the women's and men's lockers rooms was being kept intact.+ The original engraved stone archway was salvaged and placed over the new school entrance.

Other features included a new stage on the North side of the gymnasium, visual display surfaces, signs, metal lockers, operable panel partitions, stage curtains, projection screens, gym equipment, institutional casework, window treatments and elevators.
